On the Dots

By Julie Royce

Taco Timing

NATIONAL TACO DAY moved to the first Tuesday in October in 2024. Marketers liked the idea of Taco Tuesday.

Of course, in Texas, every day is taco day. Still, mark your 2025 calendars for October 7. And remember that we had the best reader recipes for tacos in March 2021—available online any day of the week.

RECOMMENDED READING

October is National Co-op Month. In October 2015 we looked at some of the terrific work co-ops do—in Texas and worldwide. Read the story at TexasCoopPower.com.

Get Over It

Sugar Land wants to rise above all the snarling traffic around Houston.

The southwest suburb is looking at two solutions that could have commuters whizzing around overhead. Electric, self-flying taxis using vertical takeoff and landing is one possibility. Another is a system of on-demand, electric gondolas, left, that would glide on cables above city streets.

"We're told to be trailblazers and not be afraid to take risks," says Melanie Beaman, the city's transportation and mobility manager.

WYATT MCSPADDEN

Before There Was Golf

My husband's family is proud of the fact that his uncle, Fred Morrison, invented the Frisbee, first called the Pluto Platter [Disc Jockeys, August 2025]. Several family members, including my then-teenage future husband, demonstrated the invention at state fairs before it was finally bought by Wham-O.

Fire Prevention

I could add another tip: During holidays that normally have fireworks involved or during an extended dry spell, at each outdoor faucet I will stage a water hose with an attached nozzle ['Every Part of Texas Is at Risk,' August 2025]. If a fire starts that could affect our house, I can fight it till the fire department arrives.

Learned Our Lesson

The quote from “Anonymous” was an insult to every educator in this state [Currents, August 2025].

The quote means, “After you've forgotten how to read, forgotten mathematics, forgotten EVERYTHING that you learned in school ... then you're truly educated.”

Preposterous! As a retired educator, I can assure you that dedicated educators are teaching Texas students what they need to continue in life—in college, on-the-job training or life experiences—which they wouldn't even be able to comprehend without those “useless things” they learned in school.

Growers continue to refine and expand the distinctive character of Texas wines

PUTTING GRAPES ON THE MAP

BY AMANDA OGLE • PHOTOS BY ERICH SCHLEGEL

Drive across Texas and you expect to see cattle, oil pump jacks, and cotton or corn.

But grapes?

They're more Texan and more common than you might think—increasingly so. And they've been here far longer than those pump jacks.

In fact, more than 14,000 acres of grapevines provide for some 600 winemaking facilities in Texas, according to the Texas Wine and Grape Growers Association. That's way up from 3,000 acres and 200 wineries just a decade ago, a reflection of the rapidly expanding \$24 billion Texas wine industry.

Spanish missionaries brought grapevines with them to Texas in the 17th century, and attempts at winemaking with wild mustang and muscadine grapes occurred until Prohibition.

Modern winemaking picked up in the 1960s as researchers at Texas Tech University planted grapes in the High Plains of the southern Panhandle, and producers are still refining what grows best where.

The state has eight American Viticultural Areas, distinct appellations of origin used on wine labels. AVAs define grape-growing regions and identify specific geographic or climatic features that affect the characteristics of grapes.

The Texas High Plains AVA is the most productive in the state, with more than 8,000 acres of vineyards, followed by

ABOVE Claire Richardson is a winemaker at Burnet-based Uplift Vineyard near Lake Buchanan.

OPPOSITE Drew Tallent with a handful of iron-rich Hickory Sands soil at Tallent Vineyards, north of Mason.

ABOVE From left, Bob Young, Bending Branch Winery CEO; Tallent; and Jen Cernosek, Bending Branch general manager, at Tallent Vineyards.

OPPOSITE Ron Yates of Spicewood Vineyards. He sources grapes from the proposed Dell Valley American Viticultural Area in the Chihuahuan Desert of far West Texas.

the Texas Hill Country AVA with about 2,500 acres. The oldest, the Mesilla Valley AVA, established in 1985, straddles Texas and New Mexico in the El Paso area.

As the Texas wine scene continues to expand, more oenophiles are learning about what they taste in the state's specific terroirs, nailing down hyperlocal characteristics that help them understand exactly what types of wines they like from each region.

"The entire country of France has more than 360 different appellations," says Valerie Elkins, managing director of membership operations for William Chris Wine Co., based in Hye, between Fredericksburg and Johnson City. "Yet Texas is larger than France, and we only have eight defined AVAs. These AVAs help the consumer to identify regions and regional expectations, so establishing more AVAs helps get more national and international understanding."

"If you were to go to a restaurant today and order a chardonnay, you'd look for a California Russian River Valley chardonnay because that's one of the regions where those grapes grow the best. We don't really have that in Texas yet."

Grape and wine producers await the approval of three viticultural areas by the U.S. Treasury's Alcohol and Tobacco Tax and Trade Bureau. The process for establishing an AVA is tedious and slow. If approved, these new appellations would be Texas' first since 2005.

LLANO UPLIFT AVA

Located entirely within the Texas Hill Country AVA, the Llano Uplift AVA would cover 1.3 million acres. The greater Hill Country region sits over an ancient limestone seabed, meaning the soils are more alkaline compared with the slightly acidic soils of the uplift, which is marked by a geological formation made primarily of granite rather than limestone.

According to Justin Scheiner, associate professor and viticulture specialist at Texas A&M University and the petitioner behind this AVA proposal, the Llano Uplift has its own aquifer system, which impacts nutrient availability and water quality and allows for different rootstocks to be planted. The uplift gets less rain than surrounding areas, which contributes to the distinct character of wines made from the vineyards here.

"Aromatically, the wines in the Llano Uplift AVA exhibit more floral, delicate and perfumed characteristics," says Claire Richardson, winemaker at Burnet-based Uplift Vineyard, which is within the proposed Llano Uplift AVA and a member of Pedernales Electric Cooperative.

"The wines are typically medium in body and have a distinct tannin structure that could be described as dusty or powdery," she says, noting that depending on the vintage and variety, herbal characteristics can be present in the wines, including mint, eucalyptus and subtle green pepper.

HICKORY SANDS DISTRICT AVA

This proposed viticultural area is located entirely within the western part of the proposed Llano Uplift AVA and on the edge of the Edwards Plateau in Mason County. Soils here are rich in iron, with granite and sandstone. Water from the Hickory Aquifer is important for irrigation.

Bending Branch Winery, based in Comfort and a member of Bandera Electric Cooperative, sources Hickory Sands grapes from Drew Tallent of Tallent Vineyards, one of the catalysts behind the application for this AVA proposal.

“Vines are able to root deeply into the soils of the Hickory Sands,” says Jennifer Cernosek, general manager of Bending Branch. “The Hickory Sands aquifer gives great water content to the soil, and the well-drained soil contributes to the fruit-forward nature of the wines from these grapes.”

Cernosek says that the wines Bending Branch makes from Tallent’s grapes tend to be softer in tannins, have a deeper mineral profile and are earthier.

“There’s a vanilla note in the wines that comes through across various grape varieties,” she says.

DELL VALLEY AVA

In the Chihuahuan Desert of far West Texas, the proposed Dell Valley AVA is in Hudspeth County, west of the Guadalupe Mountains and east of El Paso.

The higher elevation here, 3,640–4,200 feet, provides diurnal shifts, which means it’s hot during the day and cold in the mornings, so that grapes can produce sugars in the heat and acids as they cool.

Ron Yates of Spicewood Vineyards, a member of Pedernales EC, sources grapes from Dell Valley. He says the distinctive altitude, soil and farming techniques come through in the grapes.

“For me, it’s probably the best-value fruit we have in the

Cabernet franc, cabernet sauvignon, chenin blanc, petit verdot, tempranillo, muscat, riesling, chardonnay and sémillon

state,” he says. “Not a lot of folks are getting it, and it makes great wine. That mountain air up there is almost no humidity, so disease pressure for the grapes is less. Plus, deer aren’t roaming and eating your grapes.

“It’s probably one of the only places in the state that I have found where we can make lower-alcohol wine, and it’s still really jumping out with flavors and fruit.”

ABOUT TIME

Establishing a new AVA involves filing a petition that takes time to be “perfected” to meet TTB regulation requirements, a period for public comment and then rulemaking finalization. It can take years.

But the Llano Uplift AVA, filed with the government in 2022, is close to becoming official; it’s third in line to enter a public comment period, followed by Hickory Sands, filed in 2023, which is 10th in line.

However, while the AVAs aren’t yet official, you can still enjoy wines from each of these areas at wineries and vineyards across Texas and beyond.

“Texas is becoming known as a world-class wine region,” says Elkins of William Chris Wine. “Breaking down our grow regions to show the unique characteristics of the soil and growing conditions will help raise awareness for the variety of terroir Texas has and continue to make Texas-grown wine more prominent in the national and international wine world.” ■

Managing an
electric cooperative
was a job too big
for one man

Her Life *of* Service

BY D'ANN NICHOLS DRENNAN
PHOTO BY JAY PATRICK

When Jerry Jordan said “I do” to Juan D. Nichols in 1951, she didn’t realize all she was saying yes to.

Jerry, born in 1933, was 3 or 4 when electricity came to her family’s farm near Newsome in East Texas.

“My grandparents’ and my parents’ houses were on the highway, so we were fortunate,” she says. “We were one of the first to get power.” While she doesn’t remember her own home before electric lights, she recalls visiting family and friends who didn’t have such luxuries. “It made me feel very lucky.”

She never dreamed she’d devote herself to the electric industry. She says that her first husband was a sailor in Korea, her second a college student, her third a fertilizer salesman and her fourth the general manager of Wood County Electric Cooperative. With a twinkle in her clear, green eyes, the 92-year-old whispers conspiratorially, “They were all the same man.”

In 1961, Jerry was happily settled with Juan and their three small children in Woodway, just outside of Waco.

“But Juan D. didn’t want to live anywhere other than Wood County,” where he grew up, she says. A family friend who served on the board of directors at Wood County EC told Juan about a new position opening up at the East Texas co-op: power use adviser.

Juan met Virgil Shaw, the co-op’s founding general manager, at his farm just east of Quitman on a Saturday in late fall. Jerry remembers that Juan rushed back to where she and the children were visiting with her in-laws and said, “Jerry, come on, he wants to meet you too.”

Jerry purses her lips. “Juan D. told me I didn’t have time to change, so I hopped in the car and off we went.” She must have made a good impression because Shaw hired Juan that day.

Jerry Nichols, at her Quitman home, holds a portrait from her wedding to Juan D.

"It wasn't unusual," Jerry explains, "for an employer to expect the wife to help the man—without compensation, of course."

She knits her still-dark brows. "Back then, I signed everything as Mrs. J.D. Nichols, never my name. When my daddy died, the clerk sent me out of the room so Juan D. could sign the papers to inherit my property. I couldn't get a credit card, couldn't take out a bank loan without my husband's signature." Jerry smirks. "Even though I managed our money better than he did!"

When Juan and Jerry moved to Quitman, about 35 miles north of Tyler, there were no houses available to purchase. They rented a little green house in town. Jerry remembers it snowed that winter, and flakes drifted in around the closed window and piled up on the dining table next to it.

They soon bought a lot on Meadowbrook Lane and built a modest ranch-style home. It was the first all-electric residence in Quitman. Juan installed extra meters to measure how much electricity it took to run the range, water heater, and central heating and air. Jerry didn't get along with the electric stove. "Not to start with!" she exclaims. "I hated that

electric stove. Boy, when it boiled over, it made a mess!"

Not long after they moved in, there was a gas outage in town, and a gas company employee showed up at the door. Jerry told him, "I don't have any gas."

"Everybody has gas," he answered. "For your stove, your heating and your hot water."

Jerry's voice is still smug as she repeats what she told him. "Not in my house."

A college graduate with an English degree, Jerry didn't want to leave behind her young children to teach school. At that time, public school began in first grade. So Jerry started the first kindergarten in Quitman in the garage of their new home. She operated Kiddie Kollege until 1970, when she and Juan were expecting their fourth and last child.

On January 1, 1968, Juan was promoted, becoming the second general manager of Wood County EC. At age 37, he was one of the youngest managers in the state.

Not long after Juan began working for the co-op, Jerry noticed that several wives of members of the board of directors would drive their husbands to the monthly meetings and wait in their cars outside. With a laugh, she explains that the men were "too old to drive—they were in their 60s and 70s!"

Jerry invited these ladies to her home. For more than three decades, she served coffee and dessert and visited

OPPOSITE, CLOCKWISE FROM LEFT Jerry at the Nichols' house on Meadowbrook Lane, the first all-electric residence in Quitman. A moment from Juan D.'s roast when he retired from Wood County Electric Cooperative. The family gathered to celebrate Jerry and Juan D.'s 70th wedding anniversary.

ABOVE The Nicholases in 1973.

RIGHT Jerry when she served as president of the Sabine River Authority of Texas.

with the wives one Monday a month while their husbands conducted business.

"It was a consuming job for both of us," Jerry says. In those days, when an ice storm hit, Juan went to the office until the lines were cleared. Jerry cooked huge pots of chili or stew so the lineworkers could have a hot meal when they came in.

The co-op didn't have 24-hour dispatching until 1981. Before that, people called the Nichols' home phone whenever their power went out. Jerry recalls one night when the harsh ring woke Juan from a deep sleep. She heard him ask three times for the caller's last name, then finally inquire, "How do you spell that?" Jerry laughs as she remembers hearing Juan repeat back, "J-O-N-E-S."

In the '80s, the co-op hired lawyers from Washington, D.C., and consultants from Georgia to help with wholesale power purchases and other national issues affecting rural cooperatives. "There weren't many options for hotels near us in those days, so I always hosted whoever was in town at our home," Jerry remembers. "At first, I was intimidated, but I discovered these men were grateful to have a home-

PHOTOS THIS SPREAD: COURTESY JERRY NICHOLS

National Cooperative Month

October is when the more than 30,000 co-ops in the U.S. celebrate their unique business model and the cohesive communities they create and support. Included in that number are 894 electric distribution and generation and transmission cooperatives with some 42 million members. That includes 77 co-ops that power the lives of some 3 million Texans with 363,000 miles of line across the state.

cooked meal and spend time with our family."

Even though Jerry was a supportive wife, she wasn't content merely to serve stews and sip coffee. She took a leadership role in her community and in statewide organizations.

Jerry was active in the Quitman PTA, donating her time to the schools her children attended, and she was the editor of the Texas Rural Electric Women's Association newsletter.

Her proudest accomplishment came in October 1991, when Gov. Ann Richards appointed Jerry as the first female director of the Sabine River Authority of Texas. Initially, a staffer was assigned to be Jerry's "chaperone" at every board function. After the second encounter, Jerry decided, "Enough is enough."

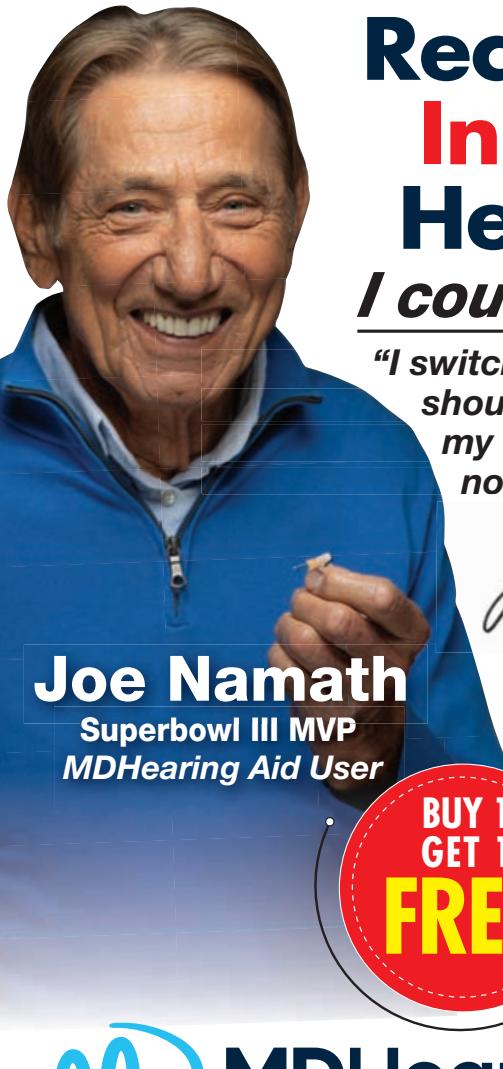

At the next meeting, she walked up to the huddle of male directors.

"They didn't have anything to say that would shock me," she exclaims, tapping a red-polished nail on the arm of her chair. "I shared these experiences with Juan D. Hopefully, I helped make it easier for women to become leaders in our co-op."

Jerry encouraged Juan to recruit women for executive positions and the board. In 1991, Cathy Roberts was chosen to fill an unexpired term, becoming the first female board member of Wood County EC. When Juan retired in 1997, he recommended Debbie Robinson to succeed him as general manager. She was one of the first women in the nation to lead an electric cooperative.

Juan died the day after Christmas in 2021, but Jerry continues to live in the house they shared. She has four children, eight grandchildren and 10 great-grandchildren, who she says are the center of her world.

Jerry rocks gently in her recliner, a smile lighting her face. "I don't know how I got so blessed," she says. "Juan D.'s and my work with the co-op provided us with opportunities I never could have imagined." ■

Understanding Capital Credits

What they mean for you

EACH YEAR, Karnes Electric Cooperative announces the allocation of capital credits. But what exactly are capital credits, and how do they affect you?

What Are Capital Credits?

Capital credits differentiate electric cooperatives from other utilities. Unlike investor-owned utilities, Karnes EC is a member-owned co-op, which means we don't operate for profit and return any profits to shareholders, our member-owners.

When our revenues for the year exceed expenses, we generate a margin. These margins are then allocated back to our members as capital credits, which reflect your ownership in KEC.

Capital credits help fund the cooperative's operations and reduce the need for borrowing, reducing your electric rates.

considers several factors, including timing, priority and method of distribution.

Capital credits are calculated based on the dollar amount of electricity a member purchases, so the retirement amount will vary from member to member and from year to year.

If you received electricity during the time period being retired and are still a current member, you will typically see a credit on your November bill. The bill will display a line item for "Capital Credits Applied" and will be automatically applied to the total on your bill.

If you received electricity during the time period being retired and are no longer an active member, a check will be mailed to the address on file if the amount is more than \$5. Inactive accounts with distributions of less than \$5 will roll over to future years, and a check will be issued once the minimum amount is reached.

Beginning in 2026, if all of your member accounts become inactive in the allocation year, the cooperative may specially retire all of the capital credits that have been allocated to you as a former member.

If you move from our service territory and are no longer a member, you should inform our office of any changes to your mailing address. Each year, many checks are returned because of invalid addresses.

When a member dies, the capital credits allocated to the account belong to the member's estate. For an estate to receive a return, a legal representative of the estate must provide KEC with a written request for such retirement, a copy of a death certificate and proper documentation of the legal representative's authority.

If you have any questions or concerns, I appreciate and welcome your feedback. ■

Capital Credits Allocation vs. Retirement: What's the Difference?

An **allocation** is made annually for each member, based on the amount of electricity purchased. An allocation is the member's share of the net margins

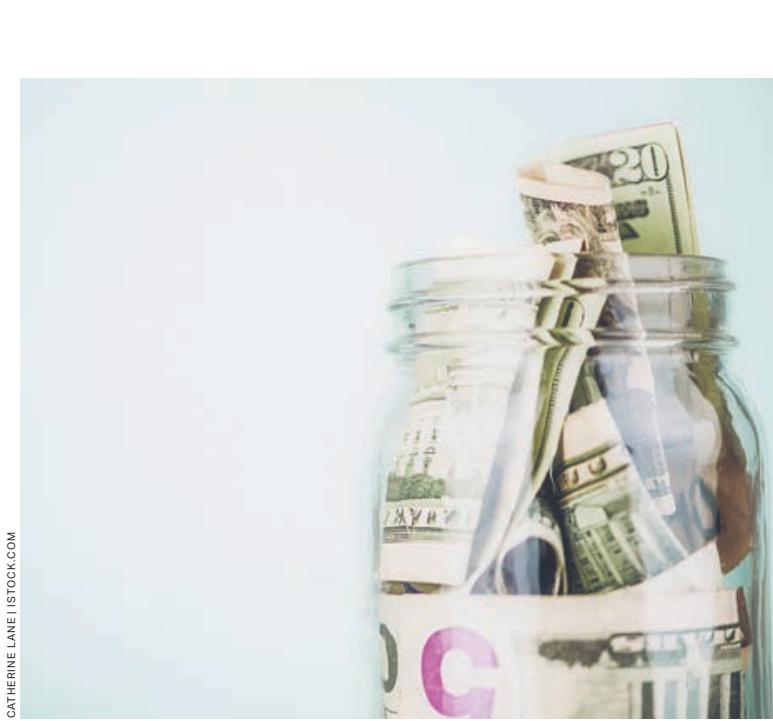

A **retirement** is the amount a member receives back as a return. It is a portion of the total allocation. The amount paid is decided annually by the board of directors based on the financial needs of the cooperative.

ENIS AKSOY | ISTOCK.COM

Over time, as financial conditions allow, these credits are retired, and the money is returned to you, our member-owners. This is a direct embodiment of cooperative principle No. 3—Members' Economic Participation.

How Are Capital Credits Returned?

Each year the board of directors reviews the financial condition of the cooperative and determines the amount of capital credits to be retired. The board

Notice of Capital Credits Allocation

CAPITAL CREDITS WERE allocated in August to Karnes Electric Cooperative member accounts for the year 2024.

After each fiscal year, cooperatives must determine what, if any, margins were made during the year and allocate those margins to members' accounts. Your co-op's margin is any money left over after all its operating costs have been paid. Since members are owners of the cooperative, those margins are allocated to their accounts.

However, those margins, or capital credits, are not paid out yet as cash or credits on your electric bill. Future returns of this amount, in full or part, will be made at the discretion of the board of directors. The board retires capital credits when doing so will not weaken the financial condition of the cooperative.

In the meantime, the funds remain invested in the cooperative, credited to each member's account—regardless of whether the member stays with Karnes EC. That's why it's very important that departing members keep the cooperative informed of their current mailing address—to ensure they receive capital credits retirements in the future.

This article serves as the official notice that capital credits have been allocated for 2024.

To calculate your allocation for 2024, multiply your total electric bill for 2024 by the factor in the table below that corresponds to your account. ■

Saving Energy During Peak Times Helps Your Neighbors

CONSERVING ELECTRICITY during peak energy use times not only lowers your monthly bill—it can benefit our entire community.

Peak times are periods of the day when demand for electricity is highest. Think early mornings, when people are getting ready for work or school, and evenings, when families cook dinner and unwind with electronics. When everyone uses energy at once, it puts pressure on the electric grid.

Karnes Electric Cooperative works around the clock to ensure that electricity flows to your home whenever you need it. Behind the scenes, an enormous and intricate system is at work—one of the most complex machines in the world—the power grid, a complex system of generation plants, distribution utilities, substations and power lines.

Electricity comes from a diverse mix of sources—hydropower, natural gas, coal, solar, wind and more. Some power plants can respond quickly to spikes in demand, and others are less flexible. Once energy is generated, it travels through high-voltage transmission lines to local utilities, like Karnes EC, which then deliver it to your home or business through distribution power lines.

When electricity demand surges during peak times, it's more expensive to generate or purchase power. If supply can't keep up, the risk of outages increases. That's why using less energy during peak hours is important. It not only eases strain on the grid but also helps you save money.

So how can you beat the peak? Start by adjusting your thermostat by a few degrees during peak hours. Smart thermostats can automate this for you. Delay using energy-hungry appliances like ovens, clothes washers and dishwashers until later in the evening.

Small actions taken by many households can lead to big results. When we all work together to reduce energy use during peak times, we protect our power grid, help control costs and ensure reliable electricity for our communities. ■

Silky Caramels

1 cup (2 sticks) butter, plus more for pan if desired
2 1/4 cups packed brown sugar
Dash salt
1 cup light corn syrup
1 can sweetened condensed milk (14 ounces)
1 teaspoon vanilla extract
Milk chocolate or dark chocolate morsels (optional)

1. Line a 9-by-9-inch pan with non-stick foil, or butter it very well.
2. Melt butter in a heavy two-quart saucepan. Add brown sugar and salt, stirring until completely mixed. Stir in corn syrup. Slowly add condensed milk, stirring constantly.
3. Cook, stirring constantly, over medium heat until candy thermometer reads 245 degrees (firm ball stage).
4. Remove saucepan from heat and stir in vanilla. Pour mixture into square pan and allow to cool completely.
5. Cut caramels into squares using kitchen scissors or a sharp knife.
6. If desired, melt chocolate according to package directions and dip each caramel piece in chocolate. Allow to set completely before wrapping.
7. Wrap in wax paper squares.

Notice of Amendments to Karnes EC's Bylaws

THE BOARD OF DIRECTORS of Karnes Electric Cooperative approved amendments to Article VII, Section 3, of the cooperative's bylaws July 22.

The updated bylaws articles pertain to capital credits in connection with furnishing electric energy and contain provisions that establish various methods of capital credits retirements, including the addition of special capital credits retirements. The amendments to the bylaws also include language to address loss recovery, board policy to establish allocation and retirement processes, and the methods for paying the amounts retired.

Karnes EC's bylaws are available at the cooperative's offices, located at 1824 W. Goodwin St. in Pleasonton and 1800 N. U.S. Highway 181 in Karnes City. A digital copy can be found on our website, karnesec.org. Inquiries may be directed to the cooperative's office at 1-888-807-3952. ■

Stop the Vampire Invasion

WHEN ELECTRONIC GADGETS are in standby mode, they use a small amount of energy even when you're not using them, and this "vampire power" adds up. Entertainment centers are full of these energy-sucking devices.

Most TVs slowly sip electricity while waiting for someone to press the on button. They use energy to remember channel lineups and keep time. Cable and satellite boxes also consume energy when we think they're off. Voice-activated devices draw a small amount of electricity as they continuously listen for your voice commands.

Although these products typically use less than 0.5 watts in standby, it adds up. A typical American home has a vampire load that adds up to 5%-10% of electricity use. The Department of Energy estimates that one home's energy vampires can add up to \$100 in wasted energy costs each year.

Identify Plug Parasites

Microwave ovens and alarm clocks, which use relatively small amounts of standby power, are acceptable to leave plugged in. Gaming consoles, TVs and other entertainment components use fairly significant amounts of power when turned off. Consider unplugging the TV in the guest room or audio equipment that you rarely use.

You don't have to worry about unplugging items with mechanical on/off switches, such as lamps, hair dryers or many small kitchen appliances—they don't draw any power when turned off.

Power Strips Save

Try plugging household electronics such as computers, monitors, printers, cellphone chargers and game systems into power strips with switches. Not only do power strips protect from power surges, they also allow you to turn off several items at once.

Consider switching to smart power strips, which help reduce energy use by automatically shutting off power to devices in standby mode. Payback for power strips can generally be achieved in less than one year. ■

EXPERIENCE THE TRIP OF A LIFETIME!

Hurricane Preparedness Guidelines

Hurricane season is June 1–November 30

If you're under a hurricane warning, find safe shelter right away.

When a hurricane is 36 hours from arriving:

- ▶ Turn on your TV or radio to get the latest weather updates and emergency instructions.
- ▶ Restock your emergency preparedness kit. Include food and water sufficient for at least three days, medications, a flashlight, batteries, cash, and first-aid supplies. Learn how to build an emergency kit at ready.gov/build-a-kit.

When a hurricane is 18–36 hours from arriving:

- ▶ Bookmark your city or county website for quick access to storm updates and emergency instructions.
- ▶ Bring indoors any loose, lightweight objects that could become projectiles in high winds (e.g., patio furniture and garbage cans); anchor objects that are unsafe to bring in (e.g., propane tanks); and trim or remove trees close enough to fall on a building.

When a hurricane is six to 18 hours from arriving:

- ▶ Turn on your TV or radio or check your city or county website every 30 minutes for the latest weather updates and emergency instructions.
- ▶ Charge your cellphone so you will have a full battery in case you lose power.

When a hurricane is six hours from arriving:

- ▶ If you're not in an area that is recommended for evacuation, plan to stay at home or where you are, and let friends and family know where you are.
- ▶ Close storm shutters and stay away from windows. Flying glass from broken windows could injure you.
- ▶ Turn your refrigerator or freezer to the coldest setting and open only when necessary. If you lose power, food will last longer. Keep a thermometer in the refrigerator to be able to check the food temperature when power is restored.

To stay safe during a hurricane:

- ▶ If told to evacuate, do so immediately. Do not drive around barricades.
- ▶ If sheltering during high winds, go to a Federal Emergency Management Agency safe room; International Code Council 500 storm shelter; or a small, interior, windowless room or hallway on the lowest floor that is not subject to flooding.
- ▶ If trapped in a building by flooding, go to the highest level of the building. Do not climb into a closed attic; you may become trapped by rising floodwaters.

To stay safe after a hurricane:

- ▶ Listen to authorities for information and special instructions.
- ▶ Do not touch electrical equipment if it is wet or if you are standing in water. If it is safe to do so, turn off electricity at the main breaker or fuse box to prevent electric shock.
- ▶ Avoid wading in floodwaters, which can contain dangerous debris. Underground or downed power lines can also electrically charge the water.

Preparación para huracanes

La temporada de huracanes es del 1 de junio al 30 de noviembre

Cuando un huracán está a 36 horas de llegar:

- ▶ Prenda su televisor o radio para obtener las últimas actualizaciones meteorológicas e instrucciones de emergencia.
- ▶ Reponga su kit de emergencias. Incluya alimentos y agua suficientes para al menos tres días, medicamentos, una linterna, pilas, dinero en efectivo y suministros de primeros auxilios. Aprenda como construir un kit de emergencia en ready.gov/build-a-kit.

Cuando un huracán está a 18–36 horas de llegar:

- ▶ Marque como favorito el sitio web de su ciudad o condado para el acceso rápido de las actualizaciones de tormentas e instrucciones de emergencia.
- ▶ Traiga adentro objetos sueltos y ligeros que puedan convertirse en proyectiles con vientos fuertes (por ejemplo, muebles de patio y botes de basura); sujeté objetos que no serían seguros para llevar adentro (por ejemplo, tanques de propano); y recorte o retire los árboles que están lo suficientemente cerca como para caer en un edificio.

Cuando un huracán está a 6–18 horas de llegar:

- ▶ Encienda su televisor o radio, o visite el sitio web de su ciudad o condado cada 30 minutos para obtener las últimas actualizaciones meteorológicas e instrucciones de emergencia.
- ▶ Cargue su teléfono celular para que tenga una batería llena en caso de que pierda energía.

Cuando un huracán está a seis horas de llegar:

- ▶ Si no se encuentra en un área recomendada para la evacuación, planifique quedarse en su casa o donde se encuentra y avise a sus amigos y familiares donde se encuentra.
- ▶ Cierre las contraventanas y aléjese de las ventanas. Los vidrios que vuelan de las ventanas rotas podrían dañarle.
- ▶ Ajuste la temperatura de su refrigerador o congelador a la posición más fría y ábralos solo cuando sea necesario. Si pierde la energía, la comida durará por más tiempo. Mantenga un termómetro en el refrigerador para poder verificar la temperatura de los alimentos cuando se restablezca la energía.

Para mantenerse a salvo durante un huracán:

- ▶ Si se le indica que evacue, hágalo inmediatamente. No maneje alrededor de las barricadas.
- ▶ Si se refugia durante vientos fuertes, vaya a una habitación segura de la Federal Emergency Management Agency, refugio contra tormentas del International Code Council 500 o una habitación o pasillo pequeña e interior sin ventanas en el piso más bajo que no esté sujeto a inundaciones.
- ▶ Si queda atrapado en un edificio por inundación, vaya al nivel más alto del edificio. No suba a un ático cerrado porque usted puede quedar atrapado por las crecientes inundaciones.

Para mantenerse a salvo después de un huracán:

- ▶ Escuche a las autoridades para obtener información e instrucciones especiales.
- ▶ No toque el equipo eléctrico si está mojado o si está parado en el agua. Si es seguro hacerlo, apague la electricidad en el interruptor principal o en la caja de fusibles para evitar una descarga eléctrica.
- ▶ Evite vadear en el agua de la inundación, que puede contener desechos peligrosos. Las líneas eléctricas subterráneas o caídas también pueden cargar el agua eléctricamente.

Plan for the Wurst

Five days of work, hundreds of volunteers, thousands of pounds of sausage, one tasty good cause

BY PAM LEBLANC • PHOTOS BY JULIA ROBINSON

HALF A DOZEN APRON-CLAD men gather around a 40-foot smoke pit behind Zion Lutheran Church in Walburg, checking on the homemade sausage sizzling on its metal racks.

At a long table nearby, more volunteers slice links and load them into tubs to be carried inside and arranged in plastic containers. In front of the church, vehicles line up at a makeshift drive-thru, their drivers buying the sausage, sweet potatoes, sauerkraut and green beans for \$15 a plate.

On the first Monday of November for more than half a century, this tiny unincorporated community about 40 miles north of Austin has come together for the Wurstbraten sausage supper.

The event began in 1971 to raise money for new carpeting in the church. The congregation's women's group came up with the idea of a sausage supper to honor the community's German heritage.

"We butchered a hog, and back then farmers still had smokehouses," says Ethel Mickan, who turns 90 this month. She served on the first organizing committee and has participated in every Wurstbraten since.

Four hundred people showed up that first year, paying just \$2.25 for adults and \$1.75 for children. The event raised enough to recarpet the church and then some.

That first year, a transformer blew out, and church members had to call the electric company. "Everybody stayed, and we kept on with the meal," Mickan says. Another year, torrential rains forced organizers to move the parking area down the road, where it wasn't so muddy.

Depending on whom you ask, organizers settled on the first Monday in November either because they wanted to do it in cooler weather, before deer season, or because Monday night wouldn't interfere with business at restaurants in the area.

"In those days there were only two or three restaurants in Georgetown, and they didn't like it when churches had events on Fridays, Saturdays or Sundays because that took away from business," Mickan says.

Over the years, Wurstbraten has grown into the quintessential community gathering. Most of the proceeds are used to fund church projects, but about 10% is donated to food banks and other nonprofit

organizations in nearby rural areas.

"The sausage is wonderful, and the meal is absolutely fabulous, but the biggest blessing of all is to see your friends," says Dan Cowan, who since 2021 has served as the *braška*, a Wendish word meaning leader of the feast.

Mickan agrees.

"I think the main thing is that we bring people together that don't get to see each other but once in a blue moon," she says.

At last year's 52nd annual Wurstbraten (the 2020 event was canceled due to the pandemic), volunteers prepared 10,500 pounds of sausage—some of it to sell by the pound, plus enough to make about 3,000 meals for pickup.

"It takes us five days and more than 300 people to pull this off, and it's all volunteer," Cowan says.

Several days before the event, organizers buy thousands of pounds of pork and beef, plus 100 pounds of black pepper, and 300 pounds of salt. They start making the sausage early Saturday, then smoke it overnight. Sunday, they prepare side dishes and sell some of the uncooked links by the pound.

"It's a pretty mild sausage," Cowan says. "I think part of the secret is that we smoke it for about 12 hours. It's stuff your grandmother would be proud of."

By 4 p.m. Monday of the 2024 event, two lines of vehicles inch their way toward the pickup area as constables direct traffic. By 5 p.m. cars stretch for a mile, and the wait is more than 30 minutes. Volunteers dash back and forth, taking orders and delivering containers of food through open vehicle windows.

"I put some in the freezer and use it for the whole year," says Nina Frias of Jarrell, who has come with her mother to pick up food. "It's hometown, it's sausage—and oh, it's magnificent."

As Frias motors away, more cars approach. Organizers say their goal is to run out of food, but that never quite happens. There's always just enough sausage to feed everyone who wants some.

"It's kind of like a miracle," Cowan says. ■

CLOCKWISE FROM TOP LEFT Dan Cowan as cars line up for Wurstbraten in 2024. Sabrina Jansak-Noble and son Elias Jansak-Noble weigh bulk sausage. Kyle Kokel, left, and Rick Zinsmeyer work the pit.

Spirituality Meets Artistry

"I never expected it to be so beautiful that it takes your breath away."

— Kaya C., on Stauer Opals

In a quaint village, nestled between rolling hills, lived a young woman with a deep appreciation for gemstones. Her grandmother gifted her a delicate cross pendant adorned with opals. The opals shimmered with a mesmerizing play of colors, reflecting hues of blues, greens, and fiery oranges. Her grandmother shared the legend of the opals, believed to bring hope, purity, and luck to those who wore them.

Using this story as inspiration, Stauer brings you the **Opal Spirit Cross Pendant**. With over 2 total carats of Kyocera lab-created opals set in .925 sterling silver encased in yellow gold, this pendant is a radiant celebration of beauty and craftsmanship. Each opal captivates with a kaleidoscopic dance of fiery oranges blending into oceanic blues, streaked with flashes of vibrant green that seem to come alive with every movement. The shimmering opals are skillfully arranged to create an enchanting, otherworldly glow, embodying the spirit of hope and harmony.

This breathtaking combination of color and craftsmanship is available as a limited availability of

only 930 pieces, making it a rare and treasured addition to your jewelry collection. Plus, when you order today, you'll receive the gold-finished sterling silver chain—a \$69 value—absolutely free!

Don't miss your chance to own this exclusive tribute to timeless elegance and meaningful symbolism.

Necklace Specifications:

- 2 1/2 ctw. Kyocera lab opals and DiamondAura® accents
- Yellow gold-finished .925 sterling silver setting
- 18" gold-clad .925 sterling silver chain

Funny Business

Rodeo clown Red Sublett traveled the world wrangling laughs

BY CHUCK LYONS

IT WAS CLAIMED, journalist Jerry Armstrong once wrote, that rodeo clown Red Sublett would ride anything that “a saddle, a riggin’ or a rope could be used on”—horses, mules and bulls, of course, but also cows, buffaloes, zebras and at least one ostrich. Sometimes he rode them straight, sometimes backwards but always with zany antics that left the crowd laughing.

Sublett was “the greatest and the highest-paid arena comic of his day,” Armstrong wrote.

He was born John Dixon Sublett in Arlington in November 1893, and he died, by then known to everyone as Red, in Dallas a scant 56 years later.

His family had settled in the countryside when the prairies were still unfenced.

The town of Sublett, now part of Arlington and some 18 miles southeast of Sublett’s modest, pink granite headstone in Mount Olivet Cemetery, bears the family name.

Sublett’s father moved his family from Texas to Oklahoma via horse-drawn covered wagon with two milk cows tied to the tailgate.

Before World War I intervened in 1917, Sublett worked rough stock on ranches, including the 101 Ranch in Oklahoma and later the Four Sixes in Texas. Before that, at just 16, he had ridden broncs and steers for Booger Red’s traveling cowboy show and Lucille Mulhall’s show.

He enlisted in the war effort and saw action in France with the medical corps before returning to his rodeo antics.

At a rodeo in Magdalena, New Mexico,

the story goes, producer Tex Austin and announcer Foghorn Clancy took Sublett aside and told him he was getting plenty of big laughs just being himself and that he should become a rodeo clown.

It paid better, they said.

As rodeo evolved from its beginning in ranch corrals in the early 1900s, promoters realized their audiences drifted away whenever there was a break in the action due to injuries and other delays. So the rodeo clown was created to keep spectators entertained during those breaks.

When bull riding became a regular part of rodeos in the 1920s and ’30s, the clown’s role—and importance—grew as he stepped in to distract the bull and allow its rider to get out of danger. Today’s rodeo protection teams, made up of highly trained athletes, are still a vital part of competitions—work that started with the clowns.

“The early clowns were cowboys who could rope and ride with the best of them ... and they were, above all, showmen,” wrote Jeanne Joy Hartnagle-Taylor in her 1993 book *Greasepaint Matadors*.

Sublett fit that description perfectly.

He picked up a trained mule named Spark Plug that he claimed could be taught to do just about anything, and together the duo performed in rodeos throughout the U.S. and abroad, including shows in London, Paris and Dublin. They also performed in films with actors Wallace Beery, Bob Steele and Pearl White.

Spark Plug died in Fort Worth in 1931, and Red’s career began sliding to an end. He died from a heart condition in the veterans hospital in Dallas on April 14, 1950.

His headstone reads, “World Famous Dean of Rodeo Clowns.” ■

Candies and Fudge

Can't beat these treats—and no baking is involved

BY VIANNEY RODRIGUEZ, FOOD EDITOR

My mami has been whipping up these delights every holiday season for as long as I can remember. She had us kids shaping coconut balls by the dozen. She gifted them, served them at family gatherings and even shipped them to relatives.

No-Bake Chocolate Coconut Joys

**1/4 cup (1/2 stick) butter, melted
1 1/2 cups sweetened shredded coconut
1 cup powdered sugar
1/2 cup semisweet chocolate chips
1/4 cup chopped pecans**

1. Line a baking sheet with parchment paper.
2. In a large bowl, stir together butter, coconut and sugar. Shape into 1-inch balls. Place on prepared baking sheet.
3. Gently press your thumb or the back of a teaspoon measuring spoon to make an indentation in the middle of each ball.
4. In a microwave-safe bowl, heat chocolate chips in 30-second increments, stirring each time, until fully melted.
5. Fill each indentation with melted chocolate. Sprinkle with pecans. Refrigerate until firm.

Aunt Ruth's Candy Cornflakes

TAMMY CARR
SAM HOUSTON EC

It doesn't get much simpler than this. These easy, quick, no-bake peanut butter treats are a perfect mix of sweet and crunchy.

1 cup corn syrup
1 cup sugar
1 1/4 cups peanut butter
6 cups cornflakes

1. Line 2 baking sheets with wax paper and set aside.
2. Combine corn syrup and sugar in a large saucepan and bring to a boil, stirring continuously until sugar is melted.
3. Remove from heat, add peanut butter and mix well.
4. Add cornflakes and mix to combine. Drop by spoonfuls onto wax paper to create a rounded candy. Cool until set and firm.

\$500 WINNER

Pumpkin Fudge

GERI HUPP
DEEP EAST TEXAS EC

Hupp's pumpkin fudge with white chocolate and cinnamon is sure to be a hit with candy lovers. It's creamy, smooth and perfect for the fall. I advise making a triple batch because this rich fudge will go fast!

2/3 cup evaporated milk
2 1/2 cups sugar
3/4 cup canned pumpkin purée
1 teaspoon ground cinnamon
1/2 teaspoon salt

1 jar marshmallow crème

(7 ounces)

2 tablespoons (1/4 stick) butter
1 cup white chocolate chips
1 teaspoon vanilla extract

1. Line a 9-by-9-inch baking pan with aluminum foil and set aside.
2. In a large saucepan, heat evaporated milk and sugar over medium-high heat, stirring occasionally. Bring to a boil.
3. Stir in pumpkin purée, cinnamon and salt. Return to a boil.
4. Stir in marshmallow crème and butter. Return to a boil. Cook, stirring occasionally, 18 minutes.
5. Remove from heat. Add chocolate chips and vanilla. Stir until creamy and all chocolate chips are melted.
6. Pour into prepared pan. Cool completely until firm.
7. Remove from pan and cut into squares. Store in a cool, dry place.

MAKES 16 PIECES

TCP \$500 Recipe Contest

BARBECUE SIDES DUE OCTOBER 10

Superior sides can make a good barbecue great. For our March issue, we're serving up your best fixin's, with the top trimming earning \$500.

UPCOMING: FIVE-INGREDIENT DINNERS DUE NOVEMBER 10

Confetti Fudge

LINDA FOREMAN
TRINITY VALLEY EC

This is the prettiest fudge I have ever made. Flecks of dried fruit swirled into a creamy white chocolate marshmallow base really do give the appearance of festive confetti.

3/4 cup (1½ sticks) butter, plus more to grease pan
3 cups sugar
½ cup sour cream
1 package white chocolate chips (12 ounces)
1 jar marshmallow crème (7 ounces)
¼ cup chopped dried cranberries
½ cup chopped dried apricots
¼ cup chopped golden raisins

1. Butter a 9-by-13-inch baking pan.
2. In a large saucepan, combine butter, sugar and sour cream over medium-high heat. Bring to a boil, then reduce heat to medium and cook 5 minutes, stirring

constantly to prevent scorching.

- 3.** Remove from heat and stir in white chocolate chips and marshmallow crème until smooth.
- 4.** Stir in cranberries, apricots and raisins. Carefully pour into prepared pan.
- 5.** Cool completely until firm. Cut into individual servings.

MAKES 12 PIECES

Sweet Sentiments

This upcoming holiday season, I'm gifting edible treats wrapped to impress! Here are a few fun ideas that take gifting to the next level.

A candy-filled Mason jar makes for a great reusable gift. Layer with parchment paper, top with a lid and tie a vibrant ribbon.

Make use of spare tins. Embellish with greenery, ribbon, bows or cupcake liners filled with candy.

Wrap candy in cellophane then tuck it in a kitchen towel for two gifts in one. I love this look!

COURTESY CHET GARNER

Terlingua's Traces

Pay your respects at this ghost town's eerie, ancient cemetery

BY CHET GARNER

IF YOU HEAD TOWARD the Big Bend and then go into the region between the national park and state park, you'll feel like you're driving onto an alien planet. Sweeping desert views in every direction punctuated by rocky cliffs of tan and red are both beautiful and bizarre.

Eventually you'll reach the notable ghost town of Terlingua (population 130 or so), a few miles from the Mexican border. It's hard to imagine how folks live in such a faraway locale, but a trip to the cemetery confirms that Texans have been living out here for a very long time.

Like every tourist, I started my visit with a bowl of red at the Starlight Theatre, a destination restaurant built inside the stone shell of an old movie theater. After filling my belly, I wandered down the street and stepped onto the hallowed ground of the town's historic cemetery.

This is not your typical green acres of eternal slumber but a dusty patch of desert with uneven stacks of rocks marking graves, along with handmade crosses, rusted metal ornaments, plastic flowers and even a few beer bottles.

The silence was broken only by the wind and the abrupt buzz of a grasshopper that I kept mistaking for a rattlesnake. Most of the graves date back to the early 1900s, when families moved here to seek their fortune in the long-defunct mercury mines. Many of the graves note the same death year: 1918, when the Spanish flu ripped through the community.

As the last bit of sunlight disappeared behind the mountains, the graveyard glowed with a dusty kind of reverence. It's clear the community still feels a great deal of pride and connection to its past. It serves as a reminder that not all who wander to this part of Texas are lost, and some choose to never leave. ■

ABOVE Chet explores the graves at the century-old Terlingua cemetery.

Your Silver Passport to Travel the World

The 5 Most Popular Pure Silver Coins on Earth in One Set

Travel the globe without leaving home with the world's five most popular pure silver coins. Newly struck for 2025 in one ounce of fine silver, each comes in Brilliant Uncirculated (BU) condition. Your trip includes stops in the United States, Canada, South Africa, Australia, and Great Britain.

We've Done the Work for You With This Extraordinary 5-Pc. World Silver Coin Set

Each of these coins is recognized for its breathtaking beauty, and for its stability even in unstable times, since each coin is backed by its government for weight, purity and legal-tender value.

2025 American Silver Eagle: The Silver Eagle is the most popular coin in the world, with its iconic Adolph Weinman Walking Liberty obverse backed by Emily Damstra's Eagle Landing reverse. Struck in 99.9% fine silver at the U.S. Mint.

2025 South African Krugerrand: The Krugerrand continues to be the best-known, most respected numismatic coin brand in the world. Struck in 99.9% fine silver at the South African Mint.

2025 Canada Maple Leaf: A highly sought-after bullion coin since 1988, this 2025 issue was struck in highly pure 99.99% silver at the Royal Canadian Mint.

2025 British Silver Britannia: One of The Royal Mint's flagship coins, this 2025 issue features Lady Britannia, defender of Britain, struck in 99.9% fine silver at The Royal Mint.

2025 Australian Silver Kangaroo: For the first time ever, the kangaroo has rounded out the top 5 in the top 5 coins in the world. This gorgeous coin continues the Australian Kangaroo series' tradition of combining high precious metal purity with stunningly detailed designs. Struck in 99.99% fine silver at the Perth Mint.

CURATED BY GRACE FULTZ

On the Dots

A little paint can go a long, long way

BY JULIE ROYCE
ILLUSTRATION BY RAUL ARIAS

A SHORT DISTANCE from where State Highway 62 meets U.S. Highway 96 sits a small white house painted with bright blue polka dots. Located in the small town of Buna, about 40 minutes north of Beaumont, this landmark was built by my grandfather, Virgil Newton Davis.

Some say this eccentric piece of history put Buna on the map.

I'm the daughter of Virgil's third son, Jud. I grew up on a family homestead in Buna until I was 14. Although I never had the opportunity to meet my grandfather, as a child I heard all kinds of stories about him.

Family described him as a hardworking man of few words with an odd sense of humor who loved his coffee black and bitter. I soaked up stories about his adventures throughout the Southwest,

busting broncos before settling in Kingfisher, Oklahoma, where he became a rancher and a father of six.

But he's a Texan through and through, and my Texas roots run deep because of Granddaddy. He was born in Newton County, in the Old Laurel community, in 1896. Although he left the state as a teenager, he returned just as the U.S. entered World War II, making his way to Buna with his family in tow.

In 1948, he built the Buna Polka-Dot House, a home that would become a part of my family's legacy. Virgil took inspiration from Native American homes that dotted the stark plains of Oklahoma. Those homes were colorfully embellished with petroglyphs and other designs. He decided to bring some of that color to the area just outside the Golden Triangle.

I often think about this modest structure, made of lath and plaster stucco and covered in blue dots applied with an old cloth attached to a two-by-four. Was he trying to create a bright spot among the dust and gray that was still clouding most of the South in the aftermath of the war and the Great Depression, or was this stoic man really just a jester at heart? Maybe it was both.

Personally, I like to imagine him as a jester. I mean, he was building a duplex with plans to paint horseshoes and teardrops on either side when he suddenly passed away in 1950. If that décor didn't make people laugh, what would?

Decades later the Buna Polka-Dot House is as meaningful to this small community as it is to my family. It's the backdrop of many community events, was the home of the chamber of commerce for a period and was the subject of many pieces of folk art.

My only wish is that Granddaddy had lived long enough to see how cherished it has become. ■
